INTERNATIONAL PRELIMINARY **EXAMINATION REPORT**

International application No. PCT/GB99/03226

I. Basis of the report

1.	re: the	sponse to an invitati	drawn on the basis of (subsion under Article 14 are refe do not contain amendments	erred to in this repo	ort as "originally fil	shed to the receiving Office i ed" and are not annexed to		
	1,3	3-10,12-26	as originally filed					
	2,2	2a,11	as received on	17/10/2000	with letter of	17/10/2000		
	Cla	aims, No.:						
	1-1	4	as originally filed					
	Dra	awings, sheets:						
	1/3	-3/3	as originally filed					
2.	With regard to the language , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.							
	ine	These elements were available or furnished to this Authority in the following language: , which is:						
		— who take gauge of a stational for the purposes of the international search (under Aule 23.1(b)).						
		- we is grad to product of the international application (dilder Nulle 46.5(b)).						
		the language of a t 55.2 and/or 55.3).	translation furnished for the	purposes of intern	ational prelimina	y examination (under Rule		
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:							
		□ contained in the international application in written form.						
		_						
	The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.							
		The statement that listing has been fur	the information recorded in nished.	n computer readabl	e form is identica	I to the written sequence		
4.	The	amendments have	resulted in the cancellation	of:				

International application No. PCT/GB99/03226

		the description,	pages:			
		the claims,	Nos.:			
		the drawings,	sheets:			
5. This report has been established as if (some of) the amendments had not been made, since considered to go beyond the disclosure as filed (Rule 70.2(c)): (Any replacement sheet containing such amendments must be referred to under item 1 and report.)					•	
					amendments must be referred to under item 1 and annexed to this	
6.	Add	litional observations, it	necessar	y:		
V.		easoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; itations and explanations supporting such statement				
1.	Stat	ement

Industrial applicability (IA)

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

Claims 1-14

Claims 1-14

Claims

VIII. Certain observations on the international application

No:

Yes:

No:

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

EXAMINATION REPORT - SEPARATE SHEET

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: EP-A-0 151 886

See also objections under item VIII.

- Document D1 describes a process for the recovery of ethyl acetate comprising two distillations, the first one performed at a pressure below 5 bar (p. 11, l. 9) for example at 1 bar (p. 21, l. 35) and the second between 10-40 bar (p. 11, l. 11), for example at 20.7 bar (p. 22, l. 19). The feedstock is supplied to the first distillation zone or to the second (see p. 10, l. 31 to p. 11, l. 31), a first distillate is supplied to the second distillation zone (see figure 3, line 167) and the second distillate is recycled to the first distillation zone (line 177). On p. 14, l. 23-25 of D1 it is explicitly stated that water is detected in the reaction mixture (the feedstock). The generation of water in the dehydrogenation reactor finds also support in the data from table 1 of the Application (see columns corresponding to water content in lines 9 and 24).
- 1.2 The subject-matter of claims 1-8, 10, 11 and 13-14 cannot therefore be considered as new, in the sense of Art. 33(2) PCT.
- Removal of water in order to obtain a valuable relative dry ethanol would be 2. considered as an obvious option within the normal working procedure of the skilled person. The introduction of the second distillate in the first distillation column at a point above the feed of the feedstock would also be obvious for the skilled person, since it is the bottoms the product to be isolated as pure as possible, whereas the distillate will be further purified (see Ullmanns Encykopädie der technischen Chemie, Verlag Chemie, 4th edition, 1972, vol. 2, p. 507).
- 2.2 No inventive step in the sense of Art. 33(3) PCT is therefore apparent for claims 9 and 12.

Re Item VII

Certain defects in the international application

The term "about" in connection with numerical values, used in throughout the 1. description and claims is vague and unclear and leaves the reader in doubt as to the meaning of the technical features to which it refers, thereby rendering the definition of the subject-matter of said claims unclear (Article 6 PCT and The Guidelines III-4.5a).

Re Item VIII

Certain observations on the international application

- 1.1 Claims 1 (partially), 7, 8, 10, 11, 13 and 14 do not meet the requirements of Art. 6 PCT in that the matter for which protection is sought is not defined. The claims attempt to define the subject-matter in terms of the result to be achieved (compositions of the distillates/bottoms, "effective" distillation pressures, etc). Such a formulation is in this case not allowable (see The PCT Guidelines, III-4.7), since it possible to define the subject-matter in terms of features such as pressures (as in claims 3 and 5), distillation temperatures, etc, leading to the afore-mentioned results.
- 1.2 For the examination procedure, those statements are to be considered as merely indicatives of the result to be obtained and not as a limiting feature (The PCT Guidelines, III-4.8).
